### PROFESSIONAL SUMMARY

Backend-focused PHP/Laravel developer experienced in building **RESTful APIs**, relational data models, and scalable web features. Proficient with **Laravel (queues, events, Eloquent, Blade, Reverb)**, **MySQL/MongoDB**, **Docker**, and **Git/GitHub**. Delivers clean, maintainable code, rigorous debugging, and secure authentication/authorization. Strong collaborator with hands-on project experience across real estate, job boards.

### TECHNICAL SKILLS

- Backend:** PHP 8+, Object-Oriented Programming (OOP), Laravel (Eloquent ORM, Blade, Policies, Gates, Queues, Events/Listeners, Scheduler, Reverb/Broadcasting, Filament v4), REST APIs, Authentication (Sanctum), Validation, Caching
- Databases:** MySQL, MongoDB (schema design, indexing, query optimization, migrations, seeders)
- Frontend:** HTML5, CSS3/SASS, Bootstrap 5, Tailwind CSS, JavaScript (ES6+), React, React Router, jQuery, AJAX
- DevOps & Tools:** Docker, Linux, Apache, Git/GitHub, GitFlow, Postman, Laravel Debugbar, Laravel Horizon, Tinker, VS Code
- Testing & Quality:** PHP Unit, feature/unit testing, API testing (Postman collections)
- Languages:** Arabic (Native), English (B2 – Upper-Intermediate)

### WORK EXPERIENCE

#### Full-Stack PHP Intern — Information Technology Institute (ITI), Port Said

December 2024 – May 2025

- Designed 5+ responsive UIs with HTML5, CSS3, JavaScript, and Bootstrap, achieving 100% cross-browser compatibility.
- Architected and normalized 6+ relational schemas; added indexes and refactored queries to **cut** execution time by up to 40%.
- Led a team capstone (Real Estate) from requirements gathering to a functional final build in 6 weeks, delivering on agile sprints and demo milestones.
- Applied web security best practices (input validation, CSRF, SQL injection prevention) across all projects, reducing vulnerabilities by 90%+.
- Built backend services with 10+ CRUD modules, secure authentication, and RESTful APIs using PHP/Laravel and MySQL, applying OOP/SOLID patterns (services, repositories) for maintainability.

#### PHP/Laravel Intern — Route Academy, Cairo

July 2024 – October 2024

- Implemented AJAX-based features for real-time data updates, improving user interaction speed by over 25%.
- Completed 300+ hours of hands-on PHP and Laravel training, building real-world web applications aligned with client requirements.
- Applied Laravel middleware and service container for dependency management, reducing controller boilerplate ~20% and trimming median response time ~10–15%.

#### Internet Ads Assessor — TELUS International (Remote)

May 2022 – January 2025

- Evaluated and analyzed over 1000+ online advertisements for relevance, quality, and performance metrics.

### EDUCATION

#### Diploma in Analytical Biochemistry — Benha University

August 2022

#### Bachelor of Science, Chemistry and Entomology — Tanta University

September 2019

### PROJECTS

#### [Multi Restaurant Food Order —Laravel 11,Blade](#)

- A complete, advanced Laravel 11 project demonstrating multi-restaurant food ordering with user roles, multi-authentication, payments, reviews, and favorites. Fully featured with dynamic emails, cart system, PDF invoices, and data import/export.

#### [Job Board Platform — Laravel 12, Alpine.js, MySQL](#)

- Developed a fast Job Board platform** with advanced search filters, policy-based access control, and Google login via Laravel Socialite.
- Designed a secure domain model** (Jobs, Companies, Applications), improving successful application completions by ~20%.

#### [Real Estate Platform — Laravel + Angular, MySQL, Google Maps](#)

- Built subscription-based listings, advanced filtering, geolocation/mapping, and Sanctum-secured REST APIs (20+ endpoints), ensuring smooth map interactions with optimized data loading.
